**Scoil Naomh Pádraig**  
**Corr A Chrainn**

**1. Introduction**

The need for this policy was highlighted by staff that is anxious to have clear direction about their intervention with students who attend this school in aspects of intimate care.

Intimate care is a key area of a person's self image and respect and as such it is vital that it is practised in a sensitive manner. It is essential that the needs and rights of students and staff are protected and that the highest standards of best practise are always ensured in intimate personal assistance.

The level of assistance required will reflect the needs of each individual student at any given time.

**Definition of Intimate Care**

Intimate care refers to all aspects of support to a student, whether by direct or indirect contact, which are associated with bodily functions, body products and personal hygiene involving intimate parts of the body.

Direct contact involves physical contact between the student and the staff member. It may involve touching of both intimate and non intimate body parts.

Indirect contact involves the supervision, observation and prompting of the student to complete personal and intimate care tasks.

Intimate care includes dressing and undressing (underwear), support with using the toilet, changing of continence pads, washing intimate body parts, showering (if required) and menstrual care.

## **5. Procedures**

### **1) Delivering Intimate Care**

- An intimate care plan will be drawn up for students who have significant support needs with regards to intimate care. The class teacher will assign a member of staff to co-ordinate the plan.
- The intimate care plan will be drawn up by a team of people including the student, the staff working with the student and, if relevant, a family member. This plan will be circulated to the staff prior to implementation.
- The plan will identify:

- Intimate Care tasks required by the pupil
- Support needs to carry out each task
- Resources required to carry out each task
- Risk management in relation to each task

In drawing up the plan consideration should be given to the wishes of the individual concerned and where relevant the preferences of their parents/guardians.

Support needs should include the staff requirements to carry out each intimate care task. Staffing levels should be reviewed with the relevant staff and parents as the needs arise during the school year.

In a situation where a staff member is obliged to undertake intimate care assistance on his/her own, that staff member will notify another staff member before assisting the student that their assistance may be required.

- In case of a student requiring manual handling as part of meeting their intimate care needs, the manual handling procedure should be defined in the Pupils File. The intimate care plan should indicate that the student's manual handling guidelines be followed about the specific lift/transfer.
- The intimate care plan will detail procedures which maximise the dignity and privacy of the student.
- The plan should ensure that the student is involved to the greatest possible extent in preparation for and carrying out of the task.
- The intimate care plan should be reviewed as required

## **2) Maintaining the dignity and privacy of a student.**

- The staff member should be familiar with the student's particular needs and preferences as outlined in their intimate care plan.
- Intimate care should be undertaken in an environment where the student's privacy can be maintained; only those who are involved in helping with the care task should be present in the room.
- Persons on placement should NOT be involved in supporting pupils' intimate care needs.

- The pupils intimate care needs should only be discussed in a private setting where confidentiality can be maintained.
- Before commencing an intimate care task, the staff member should explain to the pupil, using an appropriate method of communication, what they are about to do and how they will do it.
- Physical contact during intimate care assistance should be affirmative and supportive.
- Staff will check in advance that suitable facilities exist for intimate care procedures when on outings.

### **3) Ensuring the safety of the student and staff members.**

- The environment should support the implementation of the pupils Intimate Care Plan in a safe and dignified way.
- Staff members should ensure that they are fully trained in any specific procedures which need to be undertaken in the delivery of intimate care for an individual.
- Staff members should use protective clothing such as disposable gloves and aprons as appropriate when carrying out intimate care tasks.

### **4) Maintaining the integrity of the staff.**

- Teachers should ensure that any staff member who is required to provide intimate care is made aware of this policy and receives the appropriate advice/training prior to supporting a pupil in intimate care.
- Teachers should ensure that staff members carrying out intimate care fully understand the delicacy of the situation and the potential for misinterpretation.
- Teachers should ensure staff members involved in providing intimate care support are given the opportunity to advance their skills and expertise in the area.
- In a situation where lack of resources results in intimate care being delivered in a way which contravenes a pupil's intimate care plan, the staff member concerned should inform the teacher at the first opportunity.
- As a reasonable precaution and in keeping with best practice, a staff member will, where possible, make their intention and purpose known to another staff member, before commencing an intimate care task.

- In a situation where an issue of concern arises while carrying out an intimate care task, the staff member should report this concern immediately to the teacher or in their absence the Principal.

## **5) Reporting.**

- The pupil seems unusually sore, tender, or bruised
